

HDMI to VGA Converter with Audio

Introduction:

Y-6333 is a high performance converter which converts the signal from HDMI interface to VGA interface. With HDMI1.4b standard, it supports up to 1080P resolution. This product has an additional Micro USB port. Some devices or monitors require higher power to process the conversion. Just connect an external power supply to Micro USB port, it enhances the signal and performance.

Features:

- Convert the signal from HDMI interface to VGA interface.
- With audio output.
- Compatible with most of the monitors and displays.
- Support HDMI1.4b specification.
- Support VGA 1080P UXGA resolution.
- With an optional power port, connect to external power supply to enhance the signal and the performance.
- Plug and play, no need to install driver.

Specifications:
